3. Security & Trust

Last updated: August 2026

3.1 Our Approach to Security

Auric Travels applies layered administrative, technical, and organizational safeguards to protect user accounts, trips, bookings, and platform data, consistent with industry practice for consumer web applications.

3.2 Authentication & Access Control

The Platform uses JWT-based authentication and server-side authorization checks for protected functionality. Saved trips, bookings, and account records are associated with the authenticated user, and access is restricted to that user unless explicitly shared.

3.3 Data Storage & Infrastructure

Application data is stored in PostgreSQL infrastructure hosted through Supabase. Database credentials and server-side secrets are stored in protected backend environment variables and are not exposed to client-side code.

3.4 Protected Endpoints & Authorization

Trip and booking API endpoints verify authentication and record ownership before allowing data to be viewed, created, updated, or deleted, to reduce the risk of unauthorized access to another user's information.

3.5 Payment Security

Payment processing is handled by PCI-DSS-compliant third-party payment provider(s). Auric Travels does not store full payment card numbers on its own servers.

3.6 External Providers

Payment, mapping, hosting, and other external providers integrated into the Platform maintain their own independent security and privacy practices, which are governed by their respective terms and policies.

3.7 Your Role in Keeping Your Account Safe

Use a strong, unique password for your Auric Travels account.

Never share your login credentials with others.

Sign out of shared or public devices after use.

Report suspicious activity immediately through Help/Support.

3.8 Reporting Security Issues

If you discover a security vulnerability or suspect unauthorized access to your account, please report it promptly to:

Insert security contact email, e.g. security@auric-travels.com, and, if applicable, a responsible-disclosure policy.

3.9 Incident Response

In the event of a security incident affecting personal information, Auric Travels will investigate, take reasonable steps to contain and remediate the issue, and provide notification in accordance with applicable law.
